Answer your desk phone from a lay-by on the A34

Hello

Vodafone One Net links your company landlines and mobiles so no one misses a call, wherever they're working. It's like each of your employees having their own virtual assistant to handle incoming calls.

- **Your landlines and mobiles work together**
So your business can manage calls in and out of the office
- **Your desk phone features, made mobile**
Hunt Groups and voicemail are now integrated with mobile phones
- **One contract, one provider, One Net**
Your desk phones, mobiles and contract all in one - total simplicity
- **Keep control of your call costs**
Calls cost the same from either your desk phone or mobile

Vodafone One Net. See what it could do for your business.

The £20,000 business call

"The calls always get answered, they always get a person on the end of the phone to tell them how we can help. That way, we never lose a potential account."

Chris Goss, Director, CCBS

Like having a virtual assistant to handle incoming calls
