Business Broadband

iData
the complete **IT, telecoms & cloud** company

Broadband

Great value high speed, reliable business broadband with a range of packages designed to give your business the flexibility to grow

We recognise how important the internet is to keep your business running smoothly. Benefit from high speeds and cost-effective business broadband with a range of packages designed to give you the flexibility to grow.

We have a range of business broadband packages to choose from so that you can tailor your package to suit your business needs. Whether you are a sole trader, a small to medium business or a large organisation, we have the package to suit you.

Business Grade Broadband
iData believes that Business Grade Broadband is vital for companies who are up against their competitors. Speed is the main advantage of this broadband system which is achieved by the ability to prioritise traffic, the key benefit of a faster broadband connection is the opportunity to maintain greater quality when running numerous tasks at the same time.

MPLS (Multi-Protocol Label Switching)
MPLS is a service that offers a reliable and secure way to connect your office locations, remote and mobile workers on one secure, private network.

Whether you have a few local offices, sites across the UK or rest of the world; we can supply a solution that completely fits your needs.

Fibre Broadband
iData are providing a brand new type of broadband called fibre broadband otherwise known as 'super fast broadband'. This is supplied by operators which use fibre optic cables to increase the speed of your broadband connection. iData offer this broadband to both homes and businesses.

Service Level Agreement (SLAs)
iData offers a tailored Service Level Agreement for our Business Broadband Packages. Contact one of our team today to discuss the best solution for your business.

Ethernet Leased Line
Ethernet leased lines provide you with a dedicated line which means you won't have to share your bandwidth with any other user.

It also enables you to have a symmetric download and upload speed, essential if your business is sharing large data files, web hosting, streaming or using VoIP.
