

# Managed Print Services

**iData's Managed Print Services will save you money, boost productivity and help you improve environmental sustainability and document security**

## What is MPS?

Put simply, Managed Print Services (MPS) is a method of outsourcing the management and optimisation of your printing (whether that's your document output fleet, infrastructure, usage and related business processes). It allows you to remain focused on your core business, leaving all of your print related activities in our capable hands.

When we say "printing" we mean the overall cost of the day-to-day running and management of your printers, this includes the output and the people involved that help support your devices. Including:

- Desktop printers, multifunctional devices, photocopiers, scanners even fax machines and high-volume printers
- Technical support, assistance, maintenance, repairs, move and change requests
- Consumables including paper, ink and toner cartridges, drums and fusers

Printing can account for a large amount of a business's annual expenditure and yet surprisingly 90% don't know what they spend on print and associated costs each year. Do you? With iData's Managed Print Services contract we will increase your productivity and assess exactly how much you're spending. We will then set about creating and implementing a strategy to reduce costs.

## Benefits of MPS

### Cost Savings

Independent technology research companies say that most organisations spend 3% of their annual turnover on print. If your company has 500 employees did you know the documents that they produce are costing you approximately £125k per annum? Our Managed Print Service can save you around 30%.

### Improved Process

iData and Ricoh will work with you as your trusted partners to ensure your business processes continually improve – by embracing the latest technology including cloud services and mobile print to name but a few. We have all the support, tools and technology you need!

### Save Time

Our Managed Print Service will allow you to focus on your core business. No more time wasted sourcing the best prices for consumables and with fewer calls to your IT department they can focus on business critical tasks.

### Enhanced Security

We have the capability to deliver robust systems which facilitate secure, password protected, printing and copying – protecting your company information whilst supporting regulatory compliance.

### Simplify Your Budgets

iData and Ricoh will proactively manage all of your devices at a fixed cost per page and with one single invoice allowing budgets to become easier to manage and, more importantly there is no capital investment needed.

### Promote Sustainability

New greener measures will eliminate unnecessary printing and with our world class technology could see up to a 90% reduction in waste. Together we will reduce your energy consumptions and CO<sup>2</sup> emissions.
